

# The Trainer's Guide to

# Microsoft Teams

Brought to you by

*Last Updated: 5/26/2021*

## How to Use This Guide

This guide is designed to provide technical tips & tricks and best practices advice for virtual training conducted via Microsoft Teams. It is suggested that you use this guide to help enhance your understanding of the Microsoft Teams platform, gain confidence in your facilitation skills, and improve upon the learner experience.

While the tips & tricks in this guide are invaluable, they will not provide you with a complete training experience. For access to a bank of hundreds of virtual (and in-person) training activities go to [www.soapboxify.com](http://www.soapboxify.com). Soapbox is an all-in-one presentation creation tool that allows you to enter some basic information about your training (length, audience, objectives) and in a matter of minutes will provide you with a complete facilitator guide, slide deck, handouts, and activity instructions. Sign up today for a free 10-day trial to experience how Soapbox will revolutionize your training programs.

## Basic Feature Overview

### *Session Roles*

In Microsoft teams, there are three possible “roles” that people may have: organizer, presenter, and attendee. The organizer is the person who schedules the meeting. The organizer can assign the roles of presenter or attendee to participants before or during the meeting. Presenters can do just about anything necessary to run the meeting, while the role of attendee is more limited. *See the Producer Section for more information about roles.*

Capability	Organizer	Presenter	Attendee
Speak and share video	●	●	●
Participate in chat	●	●	●
Share content	●	●	
Privately view a PowerPoint file shared by someone else	●	●	●
Take control of someone else's PowerPoint presentation	●	●	
Mute other people	●	●	
Remove people	●	●	
Admit people from the lobby	●	●	
Change roles of participants	●	●	
Manage recording	●	●	

## Managing Roles

**Prior to a Meeting:** You will need to send out the meeting invite before you can assign roles. Once you have done that, click *Calendar*, select the meeting you created, and then select *Meeting options*. This will bring up a page where you can make some choices about *Who can present?* Depending on your needs, you may select: everyone, people in my organization, specific people, or only me (the organizer). Keep in mind:

- You will need to send the meeting invite directly to people that you want to select as a presenter.
- You are not able to select someone from a different organization to be presenter.
- The ability to select presenters isn't available for channel meetings.

**During a Meeting:** There are two ways you may change a role during a meeting:

- Select *Calendar*, click on the meeting, select *Meeting options*. Then use the dropdown menu to select *Who can present?*
- In the meeting controls, click *Show participants*. Hover over the name of the person with the role you want to change and click *More options*. Here you can *Make a presenter* or *Make an attendee*.

If the meeting is recurring, any changes you make in *Meeting options* will apply to all future meetings. However, if you make the change using the *Show participants* control, the change will not apply to future recurring meetings.

## Lobby

A Co-Organizer has all the same access and in-session features as the organizer. The only difference is that they cannot access the post-session tools such as reports. If you are utilizing a Producer during your session, you should designate them as a Co-Organizer.

Once a meeting is scheduled, you can modify the *Meeting options* for who can bypass the lobby.

You can select who can bypass the lobby:

- **People in my organization.** You may choose to allow people in your organization into the meeting directly while having people outside of your organization wait in the lobby to be admitted.
- **People in my organization and trusted organizations.** You may use this when you want certain external guests to wait in the lobby so you can approve them one by one.
- **Everyone.** This will allow everyone with the meeting link to enter the meeting without entering the lobby. This includes people who call into the meeting.

## Meeting with External Attendees

Microsoft teams allows you to have meetings with people outside of your organization, including people who do not have a Microsoft account. External attendees may have the ability to share their desktop or

application depending on which browser they are using. See **The Microsoft Teams Features by Device** chart for more details.

## *Webcam & Voice*

### 🔗 Overview

The most basic features of Microsoft Teams Meetings are the webcam and voice features. Users are prompted to enable their microphones and cameras upon logging into a meeting. Every participant has the option to mute/unmute at any time as well as the ability to turn off/on their camera at any time. In meetings of more than 5 people, Teams will automatically mute any participant who joins after the meeting has started.

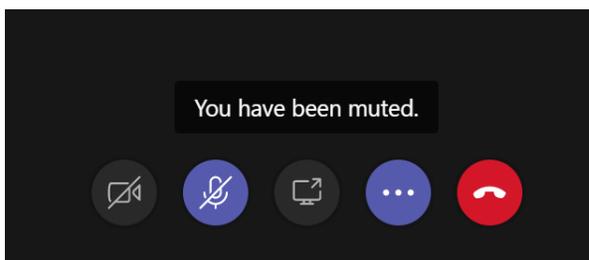

### 💡 Adult Learning

Adult learners need multi-sensory learning experiences. For virtual instructor led training (VILT) this means asking your participants to enable their cameras during training sessions. Also, adult learners need to be involved in their learning, which includes planning learning experiences with feedback and interaction, both of which are most effective on camera.

### ⚠️ Limitations

When logging onto Teams, users will be prompted to choose their audio source or enable their webcam. Teams will automatically mute participants in certain situations, so it is important that participants understand how to unmute themselves when necessary.

### 🔘 How to Turn Your Webcam/Voice On and Off

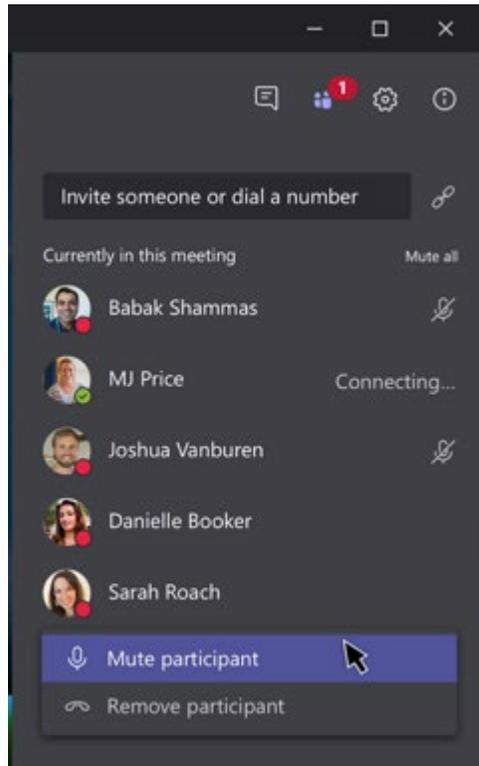

#### **Participants/Organizer**

Click the *Camera* button on the toolbar to turn on your webcam.

Click the *Microphone* button on the toolbar to turn on your microphone.

If the *Camera* button is crossed out, it means you are off camera. If the *Microphone* button is crossed out, it means you are on mute.

## Mute All

Click *Mute all* on your roster to mute all participants. They will receive a notification that they have been muted and will have the ability to unmute themselves when they need to be heard.

## 🌟 Best Practices

- 🔇 **Mute participants upon entry.** Oftentimes when people are joining a meeting there will be a lot of unappealing background noise (car phones, dogs barking, children, colleagues, etc.). Muting participants upon entry ensures that participants do not get blown away by these noises.
- 🔇 **Ask people to turn on their cameras.** At the start of your session, ask your participants to turn on their cameras. Provide a brief explanation of why you are asking them to do so.

## ⚡ Back-Up Plan

If the webcam and/or voice are not working, try signing off Microsoft Teams and back in again. If that does not solve your problem, try a computer restart.

## *Screen Share/Whiteboard*

### 🔗 Overview

Screen sharing is another Teams feature that is easy to use and can be used in a variety of ways to enhance learning. Screen share can be used to present PowerPoint slides, show a webpage or video, collaborate on a whiteboard, or to show a document.

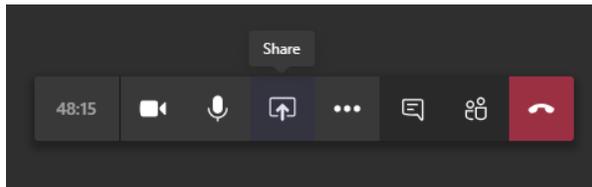

## 💡 Adult Learning

Adult learners need learning experiences that appeal to all their senses, including delivery techniques that meet the needs of audio, visual, and independent learning preferences. Using the screen share feature is one important method through which you can engage your learners.

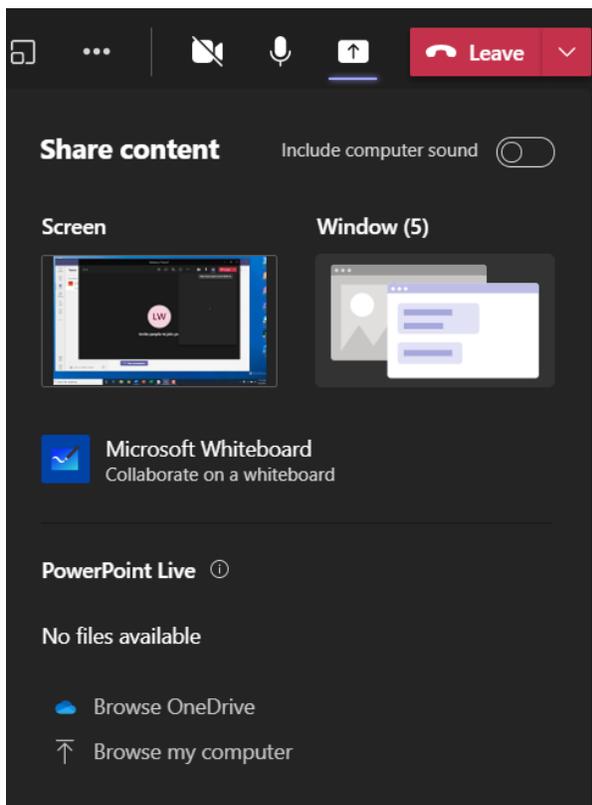

## ⚠️ Limitations

- **Mac users.** If you are using a Mac, you will be prompted to change your privacy settings before you are able to screen share.
- **Linux users.** Window sharing is not available for Linux users and Linux users also will not see the red border around what is being shared.
- **Presenters.** You cannot give presenter control to someone from outside of your organization.

## 🖱️ How to Screen Share

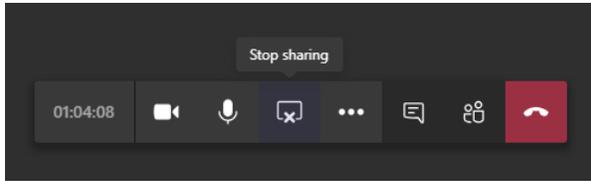

Select *Share*.

Select what you want to share. *Desktop* lets you show everything on your screen. *Window* allows you to show a specific app. *PowerPoint* allows you to show a presentation.

Microsoft Whiteboard will allow you to collaborate on a whiteboard.

A red border will appear to surround what you are sharing.

Select *Stop sharing* to stop showing your screen.

## 🖱️ How to Give Control to Another User

If you want another meeting participant to help you present you can give control to that person. This means that you will both be in control of the sharing, and you (as organizer) can take back control at any time. (NOTE: You will be unable to give control to someone from outside of your organization.) To give control to another person, from the sharing toolbar, select *Give control*. Select the name of the person you want to give control to. They will be notified that you have shared control with them. To take control back, select *Take back control*.

## 🌟 Best Practices

- 👤 **Avoid distractions.** If you are sharing a specific application, it is best practice to use the *Window* option to minimize the distractions that appear elsewhere on your screen if you share your entire desktop.
- 👤 **Share your PowerPoint slides from within the Microsoft Teams meeting menu.** When you share your slides this way, meeting participants will have the ability to select *Navigate forward* to move forward in a presentation without disrupting the presenter. Likewise, they can select *To presenter* to sync back with the presenter's view. This allows participants to return to something they missed or to see what is coming in the slides ahead.

**Note:** If you don't want people to be able to independently navigate through your PowerPoint file, click the *Eye* image to prevent it.

- 👤 **Request control.** Meeting participants can request control in the event that they would like to share something. The meeting organizer will have the ability to approve or deny the request.
- 👤 **Teach participants how to Zoom.** Participants can zoom in on shared content if necessary, by:
  1. Pinching in or out on a trackpad. (NOTE: this method does not work for Mac users)
  2. Using the keyboard shortcuts Control + Plus Sign + Minus Sign.
  3. Holding the Control key while scrolling with the mouse

## ⚡ Back-Up Plan

It is a good idea to share all your materials with your producer prior to the start of the session so that they can take over screen sharing a PowerPoint or document in the event that you have technical issues in trying to screen share. It is also a good idea to have back-up activities in mind if your planned screen share does not work. For example, if you are planning to show a video but you cannot get the video to play, you could instead tell a story that drives home the same point.

## Chat

### 🌟 Overview

Chat is another basic Teams Meeting feature that all participants have access to regardless of their device. Participants can chat with the entire meeting group or to privately chat with individual people within the meeting group. You can also share documents, emojis, GIFs via the chat feature.

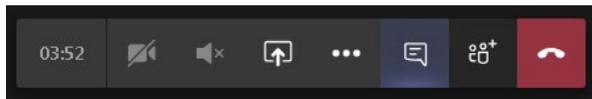

### 💡 Adult Learning

Chat is a great tool by which to allow adult learners to participate in their learning experience actively and practically in order to learn by doing. Facilitators can ask questions for participants to share how they can apply their learning to their lives. Further, the chat feature allows participants to practice and be involved in the learning experience through feedback and evaluation.

### ⚠️ Limitations

A company's Organizational IT Administration may limit or block certain features of the chat experience.

### 🖱️ How to Chat

In the toolbar, click *Show conversation*.

### 🌟 Best Practices

👤 **Chat history.** Be aware that previous chat history will show if it is a recurring meeting.

👤 **Types of Messages:**

- **Standard.** A normal message.
- **Important.** Will mark the message in bold red letters.
- **Urgent.** This will send a notification every 2 minutes for 20 minutes until participants respond.

### ⚡ Back-Up Plan

If chat is not working for some reason or you are feeling overwhelmed by the amount of talk in the chat window, you can always unmute some or all participants and ask people to verbal respond to questions or to elaborate on something that they shared in the chat window.

## Reactions

### 🔗 Overview

Microsoft Teams allows participants to raise a virtual hand to let people know that they would like to contribute without interrupting the conversation. Virtual hand raising can also be used to poll participants during yes or no questions (ex: Raise your hand if you think this is correct. Do not raise your hand if you do not think it is correct). Additionally, there are a few reactions that participants may choose to share with the group/presenter such as like, love, applause, or laugh.

### 💡 Adult Learning

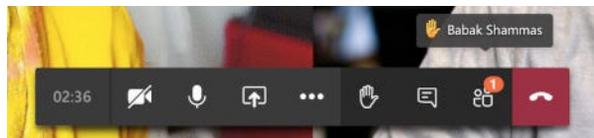

Effective adult learning programs allow for participant feedback and consultation. Reactions are a simple way for participants to be involved in their learning process and to offer support to facilitators or peers who are presenting.

### 🖱️ How to Use

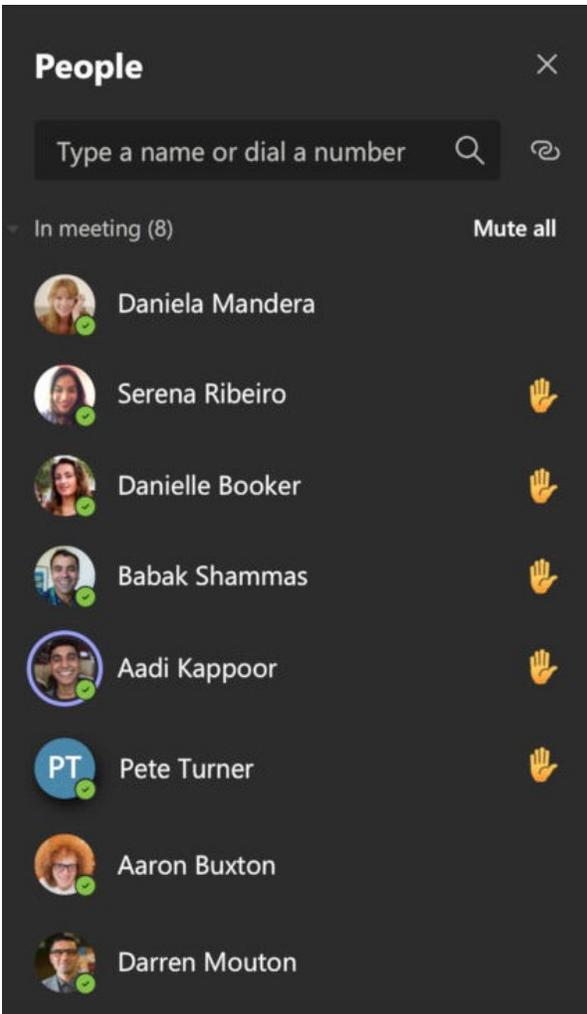

#### Participants

Click the *Reactions* icon in the toolbar to raise their virtual hand or to share a reaction.

Everyone in the meeting will be able to see who has raised a hand. Meeting presenters will receive a notification that someone has raised their hand and can lower a hand once that person has had the ability to talk.

### Organizer

Select *Show participants* to see a list of all attendees. Anyone who has raised their hand will have the icon next to their name. Names are listed in the order in which participants raised their hands.

## 🌟 Best Practices

- 🗣️ **Reactions can work like a poll.** If you would like to ask a yes or no question to participants, using the reactions tool is a great way to go. Reactions are also helpful to gauge understanding at any point during your session by asking participants to raise their hand if they do not understand the directions you have given.
- 🗣️ **Tell participants about reactions at the start of your session.** If you point out the reactions button at the start of your session, it can be a great tool for people who have questions to signal you without interrupting or jamming up the chat section.

## ⚡ Back-Up Plan

If virtual hand raising is not working for some reason an easy back-up plan is to have participants chat share their answers. If your group size is small, you may also allow participants to share answers to a simple question verbally.

## Breakout Rooms

### Overview

Breakout rooms are a way to have small group conversations or work time in a virtual environment. Like participants in a training room working together at a table, breakout rooms allow for the facilitator to put participants into individual meeting rooms with partners or small groups for as much time as they would like. At the conclusion of the breakout room session, the facilitator or producer can bring groups back together as a large group with the click of a button.

### Adult Learning

Breakout sessions allow adult learners the opportunity to practice what they have learned (and get feedback) and to share the relevance and applications of their learning by having small group conversations.

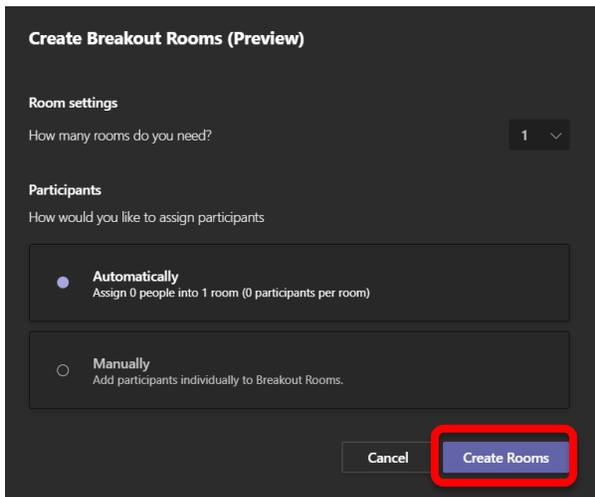

### Limitations

Only meeting Organizers using the Desktop version of Microsoft Teams (Windows or Mac) may set up and manage breakout rooms. Mobile users and Participants joining via Microsoft Teams devices are not able to join breakout rooms (Note: We suggest using the main room as a “breakout room” for any participants who are unable to join a breakout room).

### How to Use

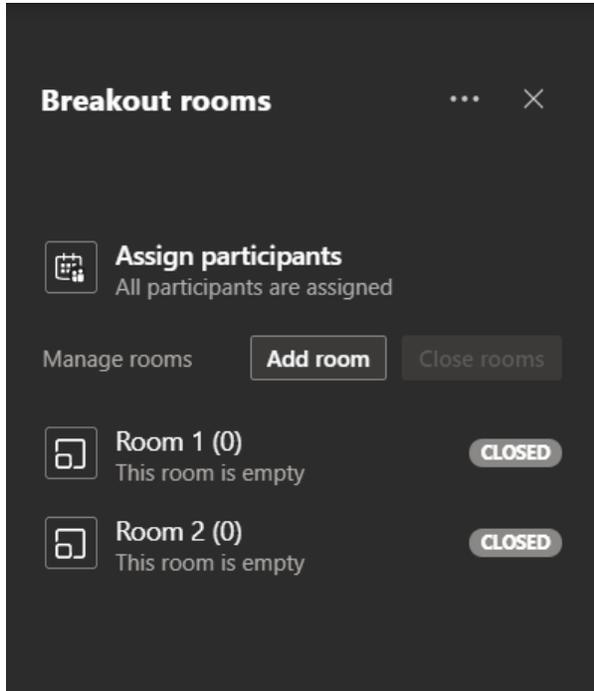

Click the *Breakout rooms* icon in the toolbar.

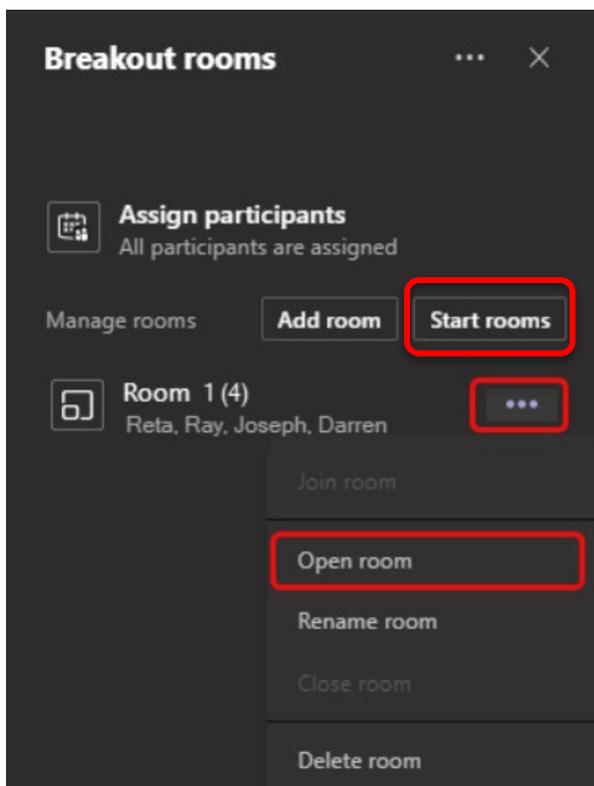

You will be prompted to decide how many rooms you need. You can also decide if you would like MS teams to automatically sort your participants for you (at random) or if you would like to manually assign the participants to rooms.

Click *Create Rooms*.

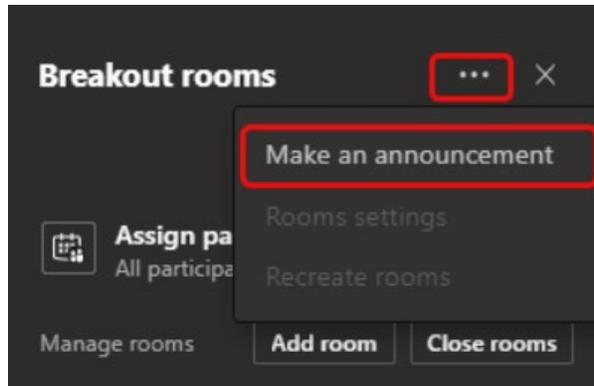

In the breakout rooms panel, you may choose to add additional rooms, move participants around, and open and close rooms.

To begin breakout rooms, simply click *Start rooms*.

If you would like to manually open one room (and not others) click *More options* (3 horizontal dots) and then *Open room*.

Use the announcements feature to share discussion questions, communicate with participants, or to give timing warnings.

To make an announcement, visible to all participants in all breakout rooms, click *More options*. Then click *Make an announcement*.

Participants in all breakout rooms will be instantly notified that you have shared an announcement that is immediately visible to them.

## 🌟 Best Practices

### Before launching breakout sessions:

- **Prepare participants for what is about to happen.** For participants who have not used breakout sessions before, the unknown can be a little scary. It is important to explain what is about to happen and to give clear directions for what they should be accomplishing within their breakout room.
- **Unmute participants.** Oftentimes participants will not know how to unmute themselves or will struggle to do so. One way to alleviate this potential hazard is to unmute all participants before you launch them into their rooms.
- **Explain screen share and annotation options.** The facilitator screen share will not be visible to participants once they enter their breakout room. However, while in a breakout room any participant will have the ability to screen share or share a whiteboard for the group to collaborate on using the annotation tools.
- **Give participants all of the materials that they will need.** The facilitator screen share is not visible while participants are in a breakout room. If you have directions for group time or questions that you would like participants to discuss while in their breakout sessions, you will need to share handouts ahead of time. A second option would be to drop into each breakout room and share a handout link in the group chat. Another feature that producers may utilize is the “broadcast message” tool within breakout rooms. Using this tool, you can send all groups a message that will pop up on their screens when they are in their breakout rooms.

### During breakout sessions:

- **Drop-in to check on groups.** Organizers can drop-in to each room. Utilize this feature to help groups who feel stuck, get conversations back on track, or ease-drop on topics to tell the larger group about things you overheard that you think the whole group would benefit from hearing at the conclusion of breakout rooms. To drop in on a room, click *More options* next to the room's name, and then *Join room*. To leave a room (as Organizer), click *Return*.
- **Call participants back with a warning count down.** It is a good idea to give participants a warning that breakout rooms will be ending shortly so that they can wrap up their conversations. Use the announcement feature to send a 2-minute warning message to participants prior to closing the breakout rooms.

**Other things to keep in mind:**

- **The breakout session chat is different from the group chat.** The chat feature in breakout rooms is separate from the main group chat. This means that anything shared in the group chat prior to launching breakout rooms will not be accessible to participants during breakout sessions. Groups will have their own breakout group chat feature available to them while they are in their breakout session. It is also important to know that when breakout rooms are closed, the room's chat ends and cannot be continued. However, the breakout room chat history and saved files will be viewable after the session.
- **You can reuse breakout rooms.** Breakout rooms remain open until they are manually closed by the Organizer. Breakout rooms can be reused throughout your session.
- **You may rename the rooms.** Room names are customizable. Any names that you give to the rooms will be visible to all Participants.
- **You can open/close each room manually or open/close all rooms at the same time.** If you do not want to call all groups back together at the same time, you can close each breakout room group manually by clicking *More options* (3 horizontal dots) next to the room, and then *Close room*. Similarly, if you do not want to launch all rooms at the same time, you may start breakout rooms one at a time by clicking *More options* next to the group's name.
- **Moving participants.** You may move participants between rooms only when breakout rooms are closed. To move a participant, hover on their name and click the check box that appears. Select *More options* (3 horizontal dots) then select the room that you would like to move that participant to.
- **Maximum number of rooms.** The maximum number of breakout rooms that can be created in Microsoft Teams is 50 rooms.
- **Additional options.** If you would like to give participants the ability to enter breakout rooms on their own, you may enable automatic entry to breakout rooms. If this is enabled, when the Organizer opens the breakout rooms, Participants will receive a message asking if they would like to join the breakout room. To enable, select *More options*, *Room settings*, then move the toggle so that *Automatically move people into rooms* is turned off. Similarly, if you would like Participants to have the ability to return to the main room at their leisure, you may enable the ability for Participants to return to the main meeting. Select *More options*, *Room settings*, then move the toggle so that *Participants can return to the main meeting* is turned on. If this feature is enabled, Participants can return to the main meeting room at any time.

** Back-Up Plan**

If you have a few people who are unable to enter their breakout room because of technical difficulties, you can use the main session as a mini “breakout room” for this group. Simply explain to people that they will be forming their own group in this main room and ask them to progress as planned. In the event that you have a catastrophic technical difficulty, and you cannot launch breakout rooms as planned, be prepared with a backup activity such as having a large group discussion as opposed to small group discussions.

# Polling

## Overview

Polling is a tool that can be set up to enhance your session. A meeting organizer or presenter can use Microsoft Forms to create polls before your meeting to be launched before, during, or after your meeting. When you launch a poll, it will appear as a pop up and will also appear in the meeting chat window. Polls can be used as a pre-test, knowledge check, to gauge opinions, or as an assessment tool.

## Adult Learning

Polls are invaluable to training sessions as they are a great method by which to gather learner feedback. Participants can be involved in the learning process and to provide feedback and consultation. Polls are also a way by which to give participants control over their learning, to gather evaluations, to check for understanding, or to allow participants to make decisions.

## Limitations

Only meeting owners and presenters can create, manage, and launch polls. If your meeting includes participants from outside of your team/organization, they will not be able to see the pop-up poll notification (or create/edit polls). People from outside of your team/organization can, however, participate in the poll in the chat field. Participants can decide if they would like to participate in a poll or not.

## How to Set Up

In Teams, select *Calendar*. Find the meeting for which you would like to add a poll and click on it. Select *Chat with Participants*. Select *+Add a tab*, then find *Forms* and click the button to *Add*. Select *Save*. A new *Polls* tab will be added to your meeting. Select *+Create New Poll*. Add question and answer options.

## Best Practices

-  **Practice launching polls prior to the start of your session.** It is important to set up all your polls prior to the start of your session and to log in and practice launching your polls. Make sure that you have someone else logged in to validate that they are seeing the poll that you have launched to participants.
-  **Share results after voting.** When setting up your poll, you can select the option to share the poll results automatically after the voting ends.
-  **Keep results anonymous.** When setting up your poll, you may decide to select the option to keep responses anonymous. Allowing participants to respond anonymously may increase participation in polls.

## ⚡ Back-Up Plan

If your polls do not launch as planned, you should be prepared to ask Participants to respond to your question aloud (using voice) or via the chat feature. If you are planning to use the poll feature as an assessment you can ask Participants to chat their responses to you using the private chat feature (so that other Participants cannot see their responses).

## Other Notable Features

- 🔊 **Captions.** To turn on live captions in a Teams meeting, go to meeting controls and select *More Options* (3 horizontal dots). Then select *Turn on live captions*. Captions detect what is said in a meeting and provides real-time captions.
- 🔊 **End of meeting reminder.** 5 minutes prior to the scheduled end of your meeting, you will receive a banner notifying you that your meeting is nearing end and it is time to wrap up your discussion.

## Producer Role

### ⚙️ Overview

The producer is the unseen facilitator. Their job is to take care of the administrative and technical aspects of the session to free up the facilitator to focus on content delivery. It is important to select your producer carefully. A successful producer is one who knows the platform well, who has the technical expertise to be able to help participants who are having problems, and someone who can jump into the role of facilitator in the event of a technical problem. In Microsoft Teams, it is important to give the role of *Presenter* to your Producer so that they have access to the tools necessary to do their job.

### ⚙️ Job Responsibilities

- ✓ **Admit people.** If you have a lobby in use for your meeting, the producer should be the person working to admit people to the meeting.
- ✓ **Answer chat questions.** It is important to keep an eye on the chat box during the session and to respond to questions or help requests, as necessary.
- ✓ **Record your session.** If you would like to have your session recorded, it should be the responsibility of the producer to make sure they enable the recording feature at the start of the session.

### ▲ Limitations

- **You need a compatible device.** Be aware that there are several device limitations that will impact someone's ability to act as Producer/Presenter. See the *Microsoft Teams Features by Device* chart for more information.

- **Assign the Producer to be Presenter prior to the start of your meeting.** You will want to assign your producer to be a presenter when you schedule your meeting so that they have access to everything they need. In addition, it is important to note that there are some limitations on who you can assign the presenter role to. *See the Managing Roles section above for more information.*

## Best Practices

- 🗣️ **Practice.** The most important thing for a successful session is for the facilitator and producer to practice together. Ensure that all features are enabled and set up and run through the entire presentation together to ensure that each person knows their responsibilities during the session.
- 🗣️ **Be on hand as a back-up facilitator.** If your facilitator has an unstable internet connection or has a computer crash, it is important to have the slides and lesson plan pulled up on your own computer and ready if the producer needs to jump in as the facilitator. Make sure that you understand the learning objectives and activities to continue the session if your facilitator experiences technical difficulties.
- 🗣️ **Be on camera.** Best practice is that both the facilitator and producer will be visible on camera.
- 🗣️ **Introduce the producer and explain their role at the start of the session.** It is important that participants are introduced to the producer at the start of the session and told that they should reach out to the producer if they need help at any point during the session.
- 🗣️ **Tell participants how to contact the producer if they need help.** The best way for participants to reach out to the producer with technical problems is through a private chat message.
- 🗣️ **Check-in with your producer periodically during your session.** It is easy to get into the flow of presenting and forget to check-in to make sure that everything is going alright. Make a point to check in with your producer periodically throughout your session. You may choose to do this verbally or through a private chat message.

## Structure

### *Pre-Session Activities*

People will always arrive at the session early. It is a good idea to have something for participants to do when they arrive at your session. This gives participants the opportunity to get comfortable with the tool and can also be a means by which to share content. Possible activities may be playing a trivia slide deck or doing a pre-session activity such as answering questions or playing a game.

### *Starting Your Session*

- ✓ **Begin with “housekeeping” items** to set expectations and help Participants get comfortable with the tools being used. You can use icebreaker or anchor activities as a means by which to teach Participants how to use a tool to accomplish this seamlessly.
- ✓ **Include breaks, as necessary.** If your session is to exceed one hour, you may need to consider adding a break. Add breaks to VILT sessions as often as you would to an in-person

training session. You may consider planning for “working breaks” prior to a breakout session or activity using the annotation tools. Ask Participants to prepare for the activity prior to taking their break. This will provide for an opportunity for people who need more assistance to get it while not holding up the session.

## Attendance

Meeting organizers can download an attendee list. However, the list must be downloaded during the meeting (it will not be available after your meeting). To download during the meeting, select *Show participants* and then select *Download attendee list*. This report will contain participants names, join time, and leave time. (NOTE: This feature must be turned on by your administrator to utilize.)

## Post-Webinar

It is best practice to send out an evaluation after your session. This is also a good opportunity to send out handouts or resources that were shared during your session.

# Practice

## Pre-Session Checklist

<b>Prior to starting your practice session:</b>	
<input type="checkbox"/>	Send your meeting invite <ul style="list-style-type: none"> <li>● Pay careful attention to the settings that you pick for your meeting such as enabling the lobby and assigning roles.</li> </ul>
<input type="checkbox"/>	Check your meeting settings <ul style="list-style-type: none"> <li>● Do you want people to be able to bypass the lobby?</li> <li>● Do you want to be notified when callers join or leave the meeting?</li> <li>● Do you want to pre-assign roles prior to the start of the meeting?</li> </ul>
<b>During your practice session:</b>	
<input type="checkbox"/>	Test your microphone and camera <ul style="list-style-type: none"> <li>● Presenter: Can your Producer see and hear you?</li> <li>● Producer: Can your Presenter see and hear you?</li> </ul>
<input type="checkbox"/>	Launch your slides <ul style="list-style-type: none"> <li>● Can your Producer see them?</li> <li>● Can you view your slide notes?</li> </ul>
<input type="checkbox"/>	Decide how you are sharing your handouts <ul style="list-style-type: none"> <li>● Are you sending them prior to the session or after the session?                     <ul style="list-style-type: none"> <li>○ If you want participants to get handouts during the session, you</li> </ul> </li> </ul>

	can share via the chat section
<input type="checkbox"/>	Run through your entire session <ul style="list-style-type: none"> <li>• Is the timing correct? Do you need to cut or add anything?</li> </ul>
<input type="checkbox"/>	Discuss with your Producer what their responsibilities are for each activity <ul style="list-style-type: none"> <li>• How will you communicate with one another during the session?</li> <li>• What are the back-up plans if something goes wrong?</li> <li>• Where do you anticipate people struggling with the technology? How can you be prepared to alleviate some of this stress?</li> </ul>
<input type="checkbox"/>	Have the producer practice clearing feedback indicators, admitting people from the lobby, sharing controls, and muting participants. <ul style="list-style-type: none"> <li>• Are you able to mute all participants? Mute a single participant?</li> <li>• Are you able to clear a virtual hand raise?</li> <li>• Are you able to admit people from the lobby?</li> <li>• Are you able to share controls with a participant?</li> </ul>
<input type="checkbox"/>	Share the lesson plan and slides with your Producer so that they can take over in the event of a technical disaster

## Handouts

Handouts are a useful addition to any session. Prior to a VILT session you need to consider how you will be sharing handouts.

### *Sharing before the session via email*

There are a few possible downsides to this method:

- Participants might not attend your session if they receive the handouts in advance.
- Participants could not receive the email or not get it prior to the session, causing a struggle during the session to get everyone on the same page.

### *Sharing via chat during the session*

There are a few possible downsides to this method:

- Participants do not have access after the session to the chat. If they forget to open it during the session, they could miss the opportunity to receive the handout.
- Handout links can get lost in a busy chat or not seen by some participants.
- Technical difficulties can cause people to not be able to open handout links.

## *Sharing after the session via email*

You may decide to share your handouts for the first time after the session OR to combine sending handouts after the session with one of the options listed above. It is a good idea to combine a session evaluation in your post-session handouts email.

The *Trainer's Guide to Microsoft Teams* is brought to you by Endurance Learning, the creators of Soapbox.

With a subscription to Soapbox you will:

- ✓ Get specific instructions for how to deliver virtual training
- ✓ Plan only activities that work well on the platform you are using
- ✓ Shorten your training design time by up to 75%!
- ✓ Focus your sessions with fresh activities that are tied directly to your objectives
- ✓ Get a Facilitator Guide with ZERO extra work
- ✓ Build virtual training sessions specifically for the tool you're using
